Re: June 2007 Monthly Report

Dear Mr. Ader:

This letter serves as the monthly progress report for June 2007, in accordance with Section X, Paragraph 29 of the RD/RA Consent Decree for the Tronox site, in Soda Springs, Idaho.

June Activities

Analytical results from the May 2007 ground and surface water sampling event were received at the end of June. Results will be reviewed and evaluated for anomalies and will be validated during the review.

The calcine cap and landfill facilities were inspected in June. The gates are closed and locked. Small areas indicating minor erosion were repaired on the south side of the cap in June. The landfill sump was not pumped since water was removed from the sump in May 2007.

The 10-acre pond was inspected and measured in June. The gates to the pond are closed and locked and the fence is in good condition. The 10-acre pond currently contains approximately 8 inches of water, measured at the south end of the pond.

July/August Activities

During the months of July and August, Tronox will continue to monitor the cap, landfill and the 10-acre pond and will pump water from the landfill sump to a concrete holding pond as necessary. Tronox will continue enhanced evaporative efforts of the 10-acre pond water by pumping the pond water to sprays within containment.

During July, analytical results from the first round of ground and surface water sampling will be reviewed in conjunction with historic data for accuracy. Data will be validated and appended to the RD/RA database for transmittal to the IDEQ and to EPA. Tronox will continue to evaluate water quality trends in advance of the second five-year review. Site inspection for the 5-year review is currently scheduled to be conducted on July 25,

2007 at the Soda Springs, Idaho facility.

During July and August, work will be initiated on the annual comprehensive review of ground and surface water quality for 2006 to 2007.

No community relation activities are planned for this period.

Problems or Delays

No delays are expected.

If you have any questions about the work or additional information is required with regards to the work described above, please contact me at (208) 547-3331, extension 230.

Sincerely,
Tronox Inc.
